

Olivia Koeppen

Instructional Design Portfolio

Online version: oliviakoeppen.com · Oliviahkoeppen@gmail.com · linkedin.com/in/oliviakoeppen

I'm an instructional technologist at the Boise State School of Nursing and a former high school English teacher. I'm passionate about supporting faculty and students, and I do that by designing accessible, meaningful online courses that are built to last: courses that keep doing the real work of helping students learn, semester after semester.

My path: From the classroom to course design

1

2021–2023

English teacher, Capital High School

Taught English to 130+ students in Boise. I designed standards-aligned units, wrote assessments, and used student data to adapt lessons for very different learners.

I learned what makes students tune out, and what makes them lean in.

2

2023–2024

Technical Records Specialist, Boise State School of Nursing

Built and maintained Canvas course sites for undergraduate and graduate nursing programs, wrote the process documentation and training materials, and trained faculty and TAs on the tools.

I learned how college courses are built, and how to support busy faculty.

3

2024–now

Instructional Technologist II, Boise State School of Nursing

Today I consult with School of Nursing faculty on their online and hybrid courses, from the first planning conversation through launch. I run one-on-one and group trainings, build the tutorials and templates faculty rely on, and coordinate projects that span many courses, with accessibility (ADA/508, WCAG) built in from the start. Once a course is live, I stay involved, supporting faculty through the semester and using what we learn to make the course better the next time it runs. Beyond my day-to-day work, I serve on School of Nursing committees and task forces, including the AI Task Force, have served on multiple hiring committees, and take part in Boise State's Shared Leadership program.

I learned how to turn a faculty member's expertise into a course students can actually navigate.

EDUCATION

M.Ed. in Educational Leadership and B.A. in English, Secondary Education,
Boise State University

How I work

I love working alongside faculty. They know their subject, and my job is to help that knowledge reach students in a course that's clear and easy to move through. I start with what students need to learn and do, build accessibility and consistency in from the beginning, and keep improving the course after launch, using what we learn each term to make the next one better. Along the way, I try to leave faculty with templates and guides they can keep using long after we've finished working together.

Projects

Course Readiness for the School of Nursing

Setting the standard for every nursing course, then getting each one ready to launch.

Course Readiness for the School of Nursing

Setting the standard for every nursing course, then getting each one ready to launch

The course standards and readiness checklist I use to get more than 100 nursing courses ready for students before the first day of class.

Audience	School of Nursing faculty and students
Responsibilities	Set the course standards for the program, designed the readiness checklist, and prepare and launch 100+ courses each term
Tools	Canvas LMS, Canvas Accessibility Report

Artifact

Canvas Launch Checklist (Sample)

Due the Friday before a course begins.

- ☐ Tech Team Assistance, 7 items
- ☐ Pre-Semester Faculty Responsibilities, 8 items

Context

The Boise State School of Nursing offers over 100 courses each term across its undergraduate and graduate programs. Each course needs a working Canvas site before the first day of classes, and I am the only staff member responsible for preparing them.

Problem

Course preparation had depended on individual requests arriving on time and being handled one at a time. With a program this size, that approach left room for inconsistency between courses and for last-minute gaps.

Approach

I developed program-specific course standards and a pre-term readiness checklist covering course structure, settings, and required program content. The standards spell out what every course needs before students arrive, like a complete first week, due dates and point values on every assignment, accessible readings, and working links. Then I work through each course before launch to make sure it meets them.

Artifact: Canvas Launch Checklist (Sample)

The sample checklist in full. A Word version is available to download below.

Course Readiness: Essential Canvas Prep Checklist

Due: Friday before your course begins.

Tech Team Assistance

Request by Fall: May 1 · Spring: December 1 · Summer: April 1. After these deadlines, faculty manage their own course preparation.

-
- | | |
|---------------------------------------|--|
| ☐ Exams | Ensure that all exam settings are appropriate, including exceptions for due dates. |
|---------------------------------------|--|
-
- | | |
|---------------------------------------|---|
| ☐ Exams | For remote proctored exams utilizing Honorlock, ensure the setup is complete. |
|---------------------------------------|---|
-
- | | |
|---|--|
| ☐ Quizzes | If utilizing the testing center, quizzes must be in Classic Quiz format, not New Quiz. |
|---|--|
-
- | | |
|--|--|
| ☐ Groups | Verify that group assignments are designated properly. |
|--|--|
-
- | | |
|--|---|
| ☐ Groups | Ensure that discussion groups are set up before students post. New students are not automatically added to groups; faculty must periodically check that no student is left out. |
|--|---|
-
- | | |
|--|---|
| ☐ Calendar | Adjust course material dates as needed. |
|--|---|
-
- | | |
|--|--|
| ☐ Roster | Add or remove faculty from the Canvas course as necessary. |
|--|--|
-
-
- ## Pre-Semester Faculty Responsibilities
- Identified by program leadership as essential before a course opens to students.
- | | |
|--|--|
| ☐ Syllabus | Updated; file name includes semester and instructor's name; includes the note on course content and Idaho Law. |
|--|--|

☐ Biography	Review and update your professional biography. A professional headshot is recommended.
---	--

☐ Module 1 / Week 1	At least the first week's content is available.
---	---

- | | |
|---|--|
| ☐ Module 1 / Week 1 | Assignments have due dates and point values. Content can be locked with a future release date if further edits are needed. |
| ☐ Readings | All required readings are included and accessible. |
| ☐ Settings | Use the Link Validator tool in Canvas to ensure no broken content links. |
| ☐ Settings | Publish the course site by Friday at midnight. |
| ☐ Accessibility | Review the accessibility report and its recommendations for content. |

Why the checklist matters

This checklist ensures that your Canvas course is fully prepared before the class starts, preventing technical issues and ensuring a smooth experience for both faculty and students.

Faculty acknowledgment: on submission, faculty confirm the course is prepared and ready for students.

Outcome

Each term, course sites have been ready by the first day of class. The checklist also sets clear request deadlines (May 1 for fall, December 1 for spring, and April 1 for summer), so faculty know when to ask for help and what's expected of them before their course opens.

Reflection

Consistency across courses matters for students who move through a program together. A predictable course layout lets them spend their attention on the content rather than on finding it.

More projects

Accessibility in Nursing Canvas Courses

Reviewing and correcting course accessibility with faculty, and catching new issues before launch

A review process I built with faculty that raised average accessibility scores from 74% to 92% across more than 100 courses.

Audience	School of Nursing students and faculty
Responsibilities	Accessibility review process, corrections within course structure, work with faculty on accessible materials, accessibility checks in the pre-term readiness checklist
Tools	Ally, TidyUp, Canvas Accessibility Report

Outcome

74% → 92%

average accessibility score across 100+
School of Nursing courses after remediation

Context

Students in the School of Nursing use Canvas for readings, lectures, clinical materials, and exams. Course content has to be usable by every student, including those who rely on screen readers,

captions, or keyboard navigation. Public universities are also required to meet federal accessibility standards.

Problem

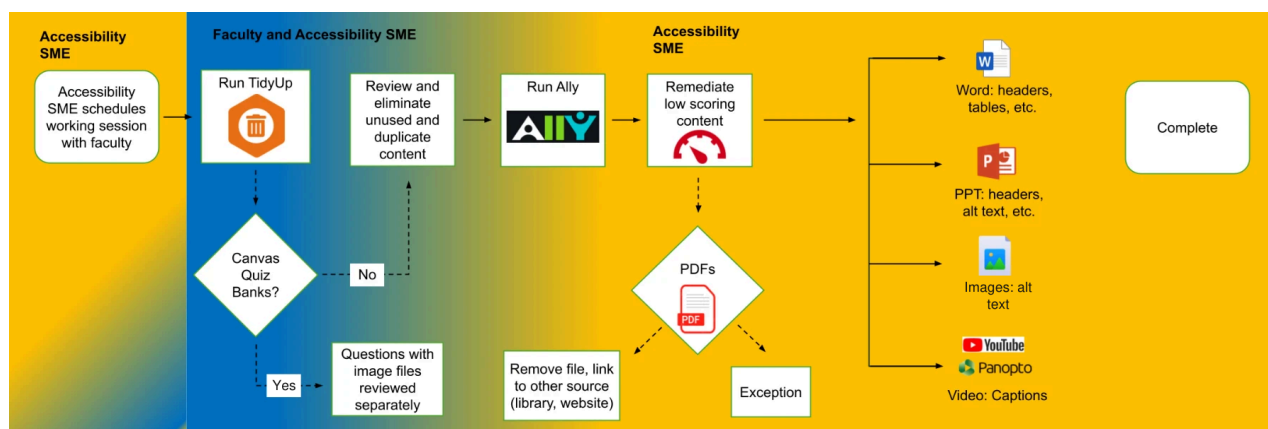

Many course sites had been built over several years by different faculty. Common issues included missing alt text on images, videos without accurate captions, scanned PDFs that screen readers could not read, and low contrast color usage.

Approach

Working with stakeholders, I developed a process to review Canvas accessibility with faculty members, using Ally, TidyUp and the Accessibility Report. I corrected issues within the course structure and worked with faculty to locate accessible materials. I added accessibility checks to the pre-term readiness checklist so new issues would be caught before course launch.

Artifact: Accessibility Process Flow

The review process used with faculty on each course. A text version follows the image.

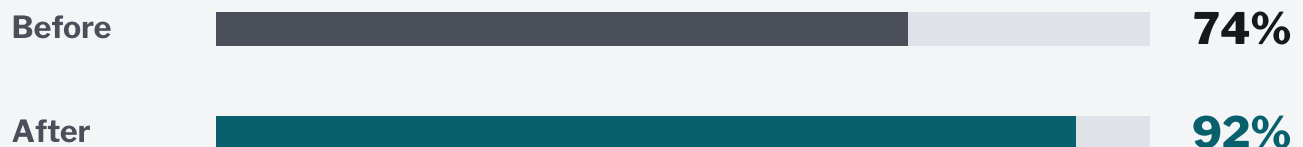

Accessibility review process for School of Nursing Canvas courses.

▼ Text version of the flowchart

1. The accessibility SME schedules a working session with faculty.
2. Faculty and the accessibility SME run TidyUp. If the course uses Canvas quiz banks, questions with image files are reviewed separately. Otherwise, they review and remove unused and duplicate content.
3. Run Ally.
4. The accessibility SME remediates low-scoring content: Word files (headers, tables), PowerPoint files (headers, alt text), images (alt text), and video on YouTube or Panopto (captions). PDFs are removed and linked to another source, such as the library or a website, or marked as an exception.
5. Complete.

Outcome

74% → 92% average accessibility scores across 100+ School of Nursing courses after remediation.

Average accessibility score across 100+ School of Nursing courses, before and after remediation.

Reflection

Accessible design benefits more students than those with a documented need. Clear headings, captions, and readable documents help a student reviewing on a phone between clinical shifts as much as one using assistive technology.

More projects

BS-DNP Online Course Template Redesign

One shared course design for the online BS-DNP program, so students only have to learn the layout once

I co-designed a new course template with eCampus and the program director, then worked with faculty to move 17 existing courses into it and build 10 new ones.

Audience	BS-DNP faculty and students
Responsibilities	Template design with eCampus and the program director, content migration with faculty, new course development in the template
Tools	Canvas LMS, course template

Outcome

17

existing courses migrated into the new template

10

courses built completely from scratch

2

new courses launch Spring 2027

Context

The Boise State School of Nursing's online BS-DNP program needed a new course template. I partnered with eCampus and the program director on the redesign, which has run for over a year.

Problem

The program's existing courses had been built at different times, so they varied in layout and structure. A new template only helps if current courses move into it without losing content or disrupting faculty, and new courses have to be built in it from the start.

Approach

I worked with eCampus and the program director to shape the new template and align it with program needs. I then migrated existing course content into the template alongside faculty, so the subject experts stayed in control of their material. I also worked with instructors to develop new courses in the template from the beginning. The template gives every module an overview with learning objectives and time estimates, and gives every assignment the same Purpose and Task format, so students can plan their week and always know what an assignment is asking of them.

Artifact: BS-DNP Template Course Redesign Examples

Screenshots of the template with placeholder content, as faculty receive it before adding their material.

Communication Expectations

It is an expectation of this program that students will use instructor feedback received on discussion boards, written papers, oral presentations, consultations, and/or all assignments to make revisions and improvements in their work. Because assignments build upon one another within and between courses, failure to use feedback and/or get clarification when feedback is not understood may impact student success and progression in courses and the program. If students have questions or concerns about the feedback, faculty and/or the program coordinator welcome the opportunity to discuss these at the student's earliest convenience. Instructors in the AGNP Program will return all assignment grades and feedback within 1 week of the assignment due date and will respond to all student emails/phone calls within 48 hours of receipt, Monday-Friday, and within 72 hours during weekends and holidays.

4 Module overview page

Every module opens with an overview: an introduction, learning objectives, and the week's tasks by due date with time estimates.

Module 1 Overview

Introduction to XXXXXXXXXXXXXXXX

This week you will dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

Learning Objectives

By the end of this week the successful student will be able to:

- Summarize ut perspiciatis unde omnis iste natus.
- Integrate sit voluptatem accusantium doloremque laudantium.
- Predict enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur.
- Design autem vel eum iure reprehenderit qui in ea voluptate velit esse quam.

Assignments and Tasks

DUE BY WEDNESDAY at 11:59 p.m. Mountain Time

- 1.01 Readings and Multimedia (2 hr)
- 1.02 Assignment: TITLE
- 1.03 Discussion: TITLE (1 hr 30 min)

DUE BY FRIDAY at 11:59 p.m. Mountain Time

- 1.04 Discussion: TITLE - Replies (30 min)

DUE BY SUNDAY at 11:59 p.m. Mountain Time

- 1.05 Assignment: TITLE (If there is a second assignment for this week) (2 hr)
- 1.06 Quiz: Chapters 1 and 2 (1 hr 30 min)
- 1.07 Prepare for Next Week

Course Questions

Previous

Next

Outcome

Seventeen existing courses have been migrated into the new template and ten courses completely from scratch have been built. The last two new courses launch Spring 2027.

Reflection

Students in a program move through many courses in sequence, and a shared template means they learn the layout once. It also gave faculty a shared starting point instead of a blank course so their time goes into teaching content.

More projects

Standardizing AI Use Expectations in the School of Nursing

A shared system for communicating AI use at the assignment level

A five-level AI scale, a shared icon library, and a faculty guide that show students what AI use is allowed on each assignment, and why.

Audience	School of Nursing faculty and students
Responsibilities	SON AI Task Force member; shared library of standardized icons; one-page faculty guide; HTML version of the scale for Canvas pages
Tools	Canvas LMS, AI Assessment Scale (Perkins, Furze, Roe & MacVaugh, 2024), HTML

Outcome

6 of 10

first-semester prelicensure nursing courses have adopted the icon system

Context

Generative AI is changing how students learn and how faculty think about assessment. Boise State has left AI rules to individual instructors, so expectations in the School of Nursing have

depended on each course. As a member of the School of Nursing (SON) AI Task Force, I worked on a shared system for communicating AI use at the assignment level.

Problem

Students met different AI rules in every course, usually in a single syllabus paragraph. Faculty were reworking assignments for a new technology, and many had no simple way to explain what was allowed and why. A blanket statement did not fit assignments that call for very different levels of AI use, and rules without a rationale can push students toward the behavior they are meant to prevent.

Approach

The Task Force proposed that the School adopt the AI Assessment Scale (Perkins, Furze, Roe & MacVaugh, 2024), a five-level scale with consistent definitions, and that each assignment carry a matching icon and a short “why” explaining the choice. We recommended it over a three-level scale because the middle level leaves too much gray area and pushes faculty to write their own definitions.

I created a shared library of standardized icons, embedded in each Canvas course, along with a one-page guide for adding them to assignments. I also built an HTML version of the scale for Canvas pages.

Artifact: AI Icon Faculty Guide

The guide faculty use to add AI scale icons to assignments in Canvas.

The guide walks faculty through six steps: open the assignment editor, insert an image from Course Images, choose the AI scale icon that matches the assignment, set it to Extra Large, and add a sentence explaining the reason for the level chosen. The icons are pre-loaded in each course and include alt text.

1 Page 1: Steps 1 and 2

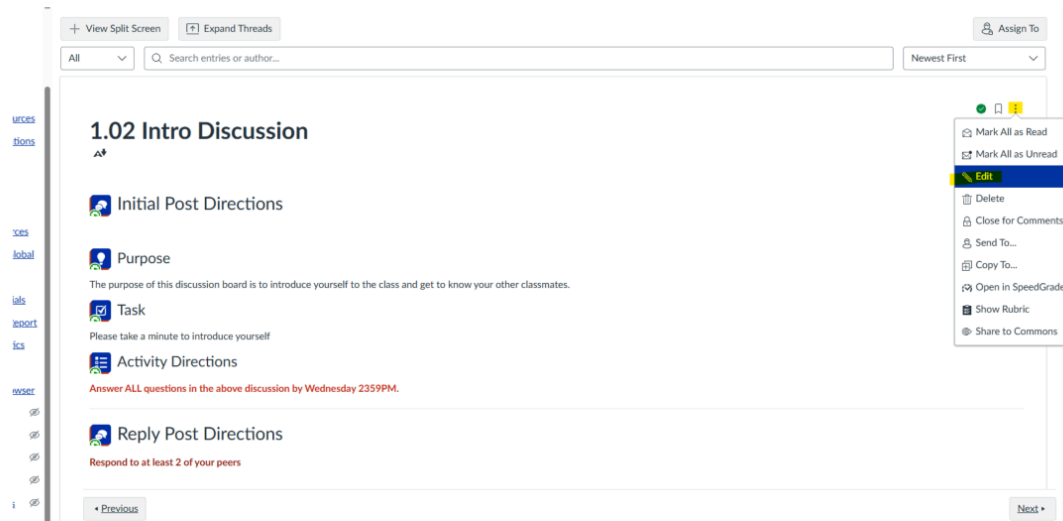

Opening the assignment editor and finding Course Images.

How to Insert AI Scale Icons in Canvas

AI scale icons are pre-loaded into your Canvas course files and include alt text for accessibility. Follow the steps below to add the appropriate icon to any assignment.

1

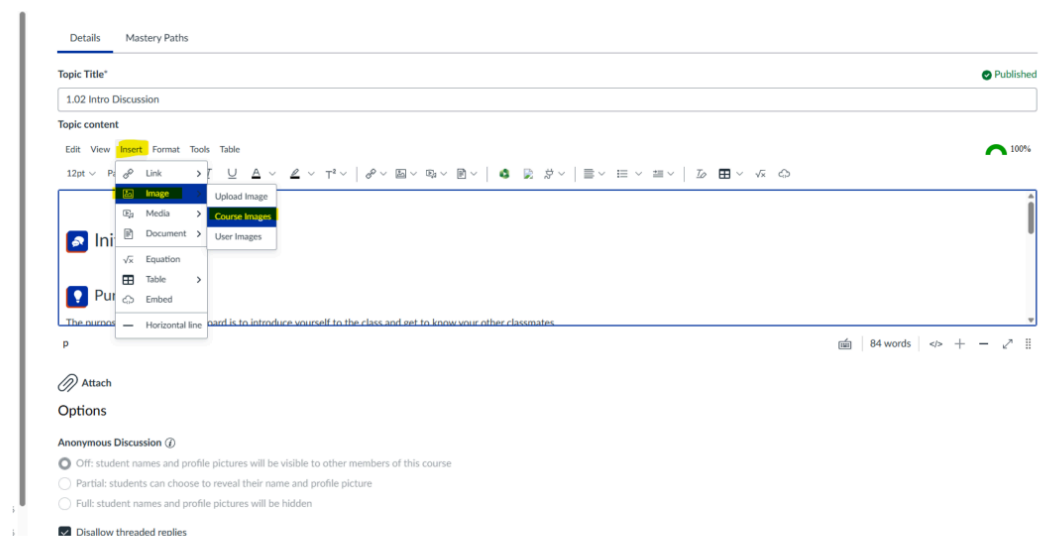

Open your assignment in Canvas. Click the three-dot menu (⋮) in the top-right corner of the page, then select "Edit" from the dropdown.

Note: Look for the three vertical dots near the top-right of your assignment.

2

In the assignment editor toolbar, click "Insert" → "Image" → "Course Images" to open the course image library.

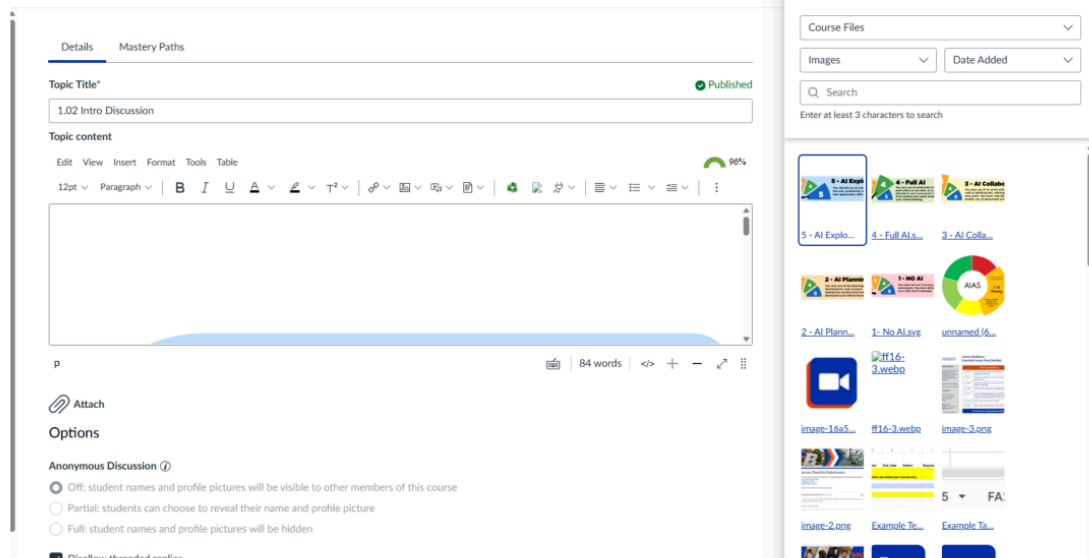

Note: "Course Images" is highlighted in the submenu - this is where the pre-loaded AI scale icons live.

2 Page 2: Steps 3 and 4

Choosing the AI scale icon that matches the assignment.

3

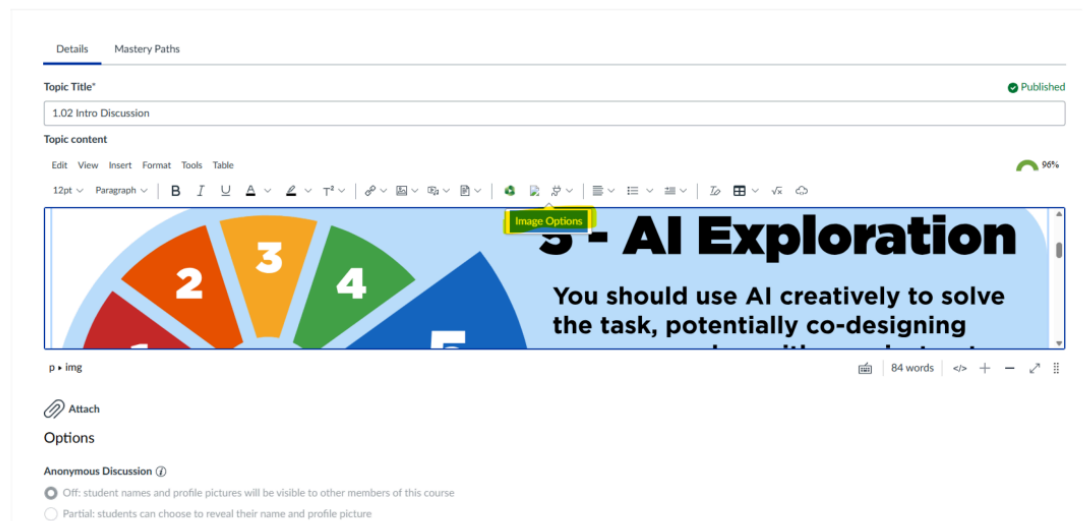

Browse the Course Images panel that appears on the right side of the screen. Select the AI level scale icon that best matches the expectations for your assignment.

 **Note:** Icons are labeled 1 through 5 (e.g., "1 - No AI", "5 - AI Exploration"). Choose the one that reflects the level of AI use permitted.

4

Once the icon appears in your assignment, click on it to select it. A toolbar will appear above the image — click "Image Options" to open the formatting panel.

 Note: "Image Options" appears as a yellow tooltip button above the selected image in the editor toolbar.

3 Page 3: Steps 5 and 6

Sizing the icon and adding a sentence that explains the reason for the level chosen.

5

In the Image Options panel on the right, locate the "Size" dropdown. Select "Extra Large" for the best readability. Click "Done" to save your changes.

Note: The "Extra Large" option is highlighted in blue in the size dropdown. The "Done" button appears in the bottom-right corner of the panel.

6

Insert a sentence below the icon explaining your rationale (your "why") for the use or non-use of AI in this assignment or activity.

Note: This is the most important step! Helping students understand why AI use is supported or not, and how this may impact their learning outcomes helps increase engagement and motivation.

If you are requiring students to disclose their AI use, here is an optional template you can use:

"I used [insert AI tool], to [describe use] as part of [insert description of the assignment or subtask of the assignment]."

Questions? Contact your SON AI team for support.

Outcome

Six of the ten first-semester prelicensure nursing courses have adopted the icon system so far, and the next step is gathering student perception data to see how it's working for students.

Reflection

Clear expectations matter for students in any assignment, and AI is no exception. Faculty keep their academic freedom to set the level. What the system standardizes is how that level is communicated, so students can focus on the learning.

Asking instructors to explain their reasoning also makes them think through what each assignment is meant to assess.

Resume

Boise, Idaho · Oliviahkoeppen@gmail.com · [linkedin.com/in/oliviakoeppen](https://www.linkedin.com/in/oliviakoeppen)

Professional summary

Instructional technology professional with proven experience providing one-on-one and group consultation to higher education faculty on online course design, Canvas LMS, and instructional technology integration. Skilled in developing faculty-facing tutorials, templates, and training resources, leading multi-course online development projects from planning through launch, and applying accessibility and quality standards (ADA/Section 508, WCAG) across scalable online programs. Collaborative, deadline-driven, and experienced managing multiple concurrent projects in fast-paced academic environments.

Core qualifications

- Faculty consultation, training, and instructional technology support
- Online course design and development project leadership
- Canvas LMS configuration, troubleshooting, and faculty enablement
- Accessibility & usability standards: ADA/Section 508, W3C/WCAG, universal design
- Creation of reusable templates, tutorials, and faculty-facing documentation
- Project management across multiple simultaneous deadlines and stakeholders
- Cross-functional collaboration with OIT, vendors, and academic leadership

Relevant experience

Instructional Technologist 2

April 2024 – Present

Boise State School of Nursing, Boise, ID

- Provide instructional design consultation and direct support to nursing faculty across the full online/hybrid course lifecycle, from strategic planning through launch and continuous improvement.
- Conduct one-on-one and group faculty consultations and trainings on Canvas LMS functionality, rubric design, multimedia integration, and accessibility best practices for diverse faculty populations.
- Serve as project liaison for multi-course online development initiatives, coordinating with faculty, academic leadership, and stakeholders to keep projects on schedule and aligned with program and quality specifications.
- Develop and maintain program-level tutorials, templates, and faculty-facing training materials to standardize quality and consistency across courses.
- Apply accessibility and quality-assurance standards (ADA/Section 508, W3C Web Accessibility Initiative guidelines) to support inclusive, student-centered online learning environments.
- Collaborate cross-functionally with OIT, vendors, and campus stakeholders to implement system updates and resolve complex instructional technology issues.
- Represent the School of Nursing on committees and task forces, including the School of Nursing AI Task Force and Boise State Shared Leadership program.

Technical Records Specialist 2

July 2023 – April 2024

Boise State School of Nursing, Boise, ID

- Supported development and maintenance of Canvas course sites for undergraduate and graduate nursing programs, ensuring alignment with institutional standards and program needs.
- Served as liaison between academic programs and instructional technology teams, supporting compliance with educational technology policies.

- Created and maintained process documentation and training materials, improving efficiency and consistency in course support practices.
 - Delivered training and technical assistance to faculty and teaching assistants, promoting effective and consistent use of LMS tools and instructional technologies.
-

English Language Arts Instructor

August 2021 – May 2023

Capital Senior High School, Boise, ID

- Designed and delivered standards-aligned curricula incorporating educational technology to enhance student engagement and learning outcomes.
 - Developed assessments and analyzed student data to inform instructional decisions and differentiate instruction for diverse learners.
 - Delivered instruction for 130+ students, integrating digital tools to improve learning outcomes.
 - Collaborated with colleagues on school-wide improvement initiatives and professional learning efforts.
-

Student Teacher

August 2020 – May 2021

Boise High School, Boise, ID

- Planned and delivered instruction aligned with learning objectives and developmental needs for Pre-AP English 10 students.
 - Managed classroom responsibilities including assessment, student support, and instructional recordkeeping.
-

Education

- Master of Education in Educational Leadership, Boise State University
 - Bachelor of Arts in English, Secondary Education, Boise State University
-

Additional certifications and projects

- School of Nursing IMPACT Staff Award, Spring 2023
- Effective Online Teaching Course, Center for Teaching and Learning
- Co-Facilitator, Innovate Idaho AI Symposium, April 2025
- Boise State Shared Leadership Participant, 2024–2026
- School of Nursing AI Task Force, August 2025–Present
